THE JOE CROSS 10 Day Juicing & Eating Plan

10-DAY PLAN

Experience the benefits of juicing while also consuming some plantbased meals in this 10-day combo plan. Including meals as part of a Reboot allows flexibility for families, busy people and those who travel and for those who aren't quite ready to commit to a 100% juicing plan.

What's a Reboot?

It's a period of time where you commit to drinking and eating fruits and vegetables in order to regain or sustain your vitality, lose weight and kick-start healthy habits. During this 10-Day Reboot plan, you'll consume both juices and plant-based meals for 10 days. You can find a free 3-day juice-only plan at **rebootwithjoe.com**, along with longer **Guided Reboot Programs**, led by a certified nutritionist.

Why Reboot?

A Reboot is the perfect way to power up your system with fresh, clean, plant-based energy. When you consume more fruit and vegetables, your system is flooded with an abundance of vitamins, minerals and phytonutrients—plant compounds that help your body stay strong and fight disease.

A 3-Day Reboot Will Help You

- Reset your system to crave healthy foods
- Jumpstart weight loss
- Boost your immune system
- Promote beautiful, clear skin
- Promote detoxification
- Ease digestion

Who Can Reboot?

A Reboot is for almost everyone with a few exceptions. Please don't attempt a Reboot if you are pregnant or nursing, under 18 or have a severe medical condition. Check with your doctor if you are unsure.

If you are currently on medication, ask your doctor before starting this or any diet program.

Calorie Counting

This 3-Day Reboot is designed to provide

approximately 1,200 calories or more a day but actual calories and yields will vary depending on your juicer. We don't focus on counting calories. In fact, drinking more vegetable juice and water, not less like your average "diet plan," will work best for weight loss. If you don't want to lose weight, you can still Reboot for the amazing health benefits. Just aim to drink more juice to support your metabolism.

Set Your Reboot Expectations

Think of juicing like any new skill: it takes practice. In the beginning, you may experience some setbacks. Don't worry that's all part of the process. As you start this 3-Day Reboot, you may be eliminating many of your comfort foods so you may experience some emotional release along with some physical symptoms. Be prepared for a few aches and pains, sniffles or cranky feelings. To set yourself up for success, follow the Getting Ready steps below. Similarly, take a few days afterward to include lots of fruits and veggies in your daily diet.

Getting Ready

The cleaner your diet is going into the Reboot, the faster you will get to the feel-great phase! The week before you start your Reboot:

- Reduce processed or "junk" foods, white flours, sugar, desserts, fried food
- Eliminate fast food, processed meats like bacon or deli meats.
- Transition off meat
- · Transition off dairy
- Reduce caffeine and work to eliminate alcohol
- Stay hydrated (at least 64-72 ounces (2-2.5 Litres) a day, or more if you are over weight or active)
- Get extra sleep
- Eat more salads, beans, legumes, nuts, seeds and vegetables
- · Drink at least one fresh juice daily

• Purchase or borrow a juicer if you don't already have one. See our Juicer Buying Guide.

One Day Before Reboot

Medication: Stop all non-prescription vitamins and supplements during the Reboot, unless you have been advised to take them by a physician. Don't take any self-prescribed, over the-counter medications.

Juicer: Set up your juicer the night before—get all parts cleaned and ready on your kitchen counter.

Exercise

Physical activity is important during your Reboot but we recommend you take it easy for three days. When you Reboot, you want to conserve energy to help your body rest and keep your immune system strong. You may also be ingesting fewer calories and macronutrients such as protein and carbohydrates than usual so you'll want to downshift your workout accordingly. Walking, gentle yoga, tai chi, Pilates, and easy cycling are all examples of good activities to do during your Reboot.

Possible Side Effects or Symptoms

While there are many potential benefits of consuming a plant-based diet, there are some potentially serious side effects of a Reboot that you need to be aware of. If any of these symptoms occur please consult your physician to be sure you can manage them wisely. Most side effects are temporary and will resolve after a few days, or once you resume a healthy diet following your Reboot. These include but are not limited to: fatigue, headache, dizziness, low blood sugar, constipation or diarrhea. Increasing your fluid intake by drinking more water, coconut water or another juice, can often resolve these side effects.

If you experience any of the following symptoms, please stop your Reboot and contact your physician: fainting, extreme dizziness, low blood pressure, significant weight loss, vomiting, severe diarrhea. Take care to evaluate how you are responding to the Reboot before driving or operating any heavy machinery.

After Your Reboot

After your 10-Day Reboot, you can keep juicing by including a juice a day to enjoy more fruits and vegetables. If you have moderate or significant weight loss goals, consider a longer Reboot. The first 3 days of a Reboot are typically the hardest, once you've completed 10 days, feel free to keep going if you are feeling good.

If you have specific health issues, check out our website to find fruit, veggie and juice recipes that can help. You can find more plans at RebootwithJoe.com, in the "Reboot with Joe Juice Diet" book.
